PREFACE

CINL is the original CUMULATIVE INDEX TO NURSING LITERATURE. It offers an easy-to-find and easy-to-read, authoritative subject-author reference to a broad selection of subject matter of importance to progressive nurses and related health scientists.

CINL is a guide to book reviews, pamphlets, illustrated material, films, filmstrips and recordings.

CINL is the only index to nursing periodical literature for the years 1956 through 1965.

CINL covers all major nursing periodicals in the English language.

CINL indexers cover selectively for the nurse other ancillary serials including major medical journals. Approximately twenty-five per cent of the articles indexed are from non-nursing journals.

CINL, since early 1967 and the inception of the National League for Nursing's Standing Publications Service, indexes all serials published by the League.

CINL indexed the American Nurses' Association Subscription Service from February 1968 - January 1970 when the Service was discontinued by the Association.

CINL, beginning with the 1970 cumulation, lists all ancillary journals scanned, giving dates for articles indexed.

New titles indexed in the 1970 Cumulation include:

- Ghanian Nurse
- Journal of Continuing Education
in Nursing
- Medical Insight
- Newsette
- Nigerian Nurse
- Nursing Update
- Point of View
- Practical Approaches to Nursing
- Service Administration
- Supervisor Nurse

HOW TO USE THE INDEX

The CUMULATIVE INDEX TO NURSING LITERATURE is a subject-author (or name) index. Beginning with 1967, Volume 12, subjects and authors (or names) are filed separately. Subjects and cross references appear first. The author (or name) section, i.e., authors and the names of biographees, follows.

Frequently subject headings are divided, as:

NURSING EDUCATION--GRADUATE

Ample use of "See" and "See also" references guide the user, as:

Play See: RECREATION; RECREATIONAL THERAPY

PHYSICAL THERAPY See also: EXERCISE; HYDROTHERAPY; MASSAGE

To aid the user of the Index, all "See" and "See also" references are included in the cumulated volumes even though the subject referred to may not be used in that particular volume. The searcher is thus directed to other cumulations and/or bimonthly issues.

Entries are not limited to a minimal indication of the general context of the article. Entries are made under all headings where material may be pertinent and which is not covered by appropriate cross references, and sometimes in addition to such cross references.

In the subject entries the names of the first two authors, or the name of the first author if more than two, appear in parenthesis after the title.

Example:

CORNEAL TRANSPLANTATION

The present status of corneal transplantation
(Rabb) Nurs Clin N Am 5:477+, Sept 70

In author entries the author's last name appears first and is followed by his initials, the title of the article, the abbreviated journal title, the volume, page, month and year.

Example:

TURNER R: A method of working with disturbed children. AJN 70:2146+, Oct 70

Full titles for the abbreviated titles used in the entries are given in the List of Journals Indexed, in the front of the Index. Following is an added list of abbreviations of journal titles for ancillary journals from which articles have been selected for inclusion in the supplement or cumulation.

Beginning in January, 1968 under each subject heading the entries are arranged by journal title.

Beginning in January, 1969 "See" references are included for joint authors.

LIST OF JOURNALS AND SERIALS INDEXED

- ACOG Nurses Bull--ACOG Nurses Bulletin. The American College of Obstetricians and Gynecologists, 79 West Monroe Street, Chicago, Illinois 60603
